SUMMARY

Front end web developer with a professional background in the education and recruitment sectors, most recently a Head of Year and secondary school Science Teacher. Technology is one of my hobbies, I have built my own PC and having learnt about hardware I wanted to learn how computers are programmed. I have recently completed a skills bootcamp in front end web development and have loved it so much that I now want to pursue this as a career. I love learning new skills so the IT sector appeals to me as you are always learning and growing. I feel that the professionalism and soft skills that I have developed in recruitment and education, combined with my newfound technical skills in web development will make me an asset to any prospective employer. I am ambitious and am keen to ultimately progress into a Technical Project Management role and beyond.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript ES6, Bootstrap 5, Node.js, React, jQuery, OOP
Git, Font Awesome, responsive web design, mobile first principles

SOFT SKILLS

Team leader, team player, collaborative, analytical, problem-solver, communication, emotional intelligence, organisation, multi-tasker, adaptable, determined, thorough, public speaking and presenting, self-motivated

PROJECTS

Yūgen | [Repository](#) | URL: <https://tejpatta.github.io/Travel-Inspiration/>

Role: Co-developer

- A travel inspiration application that helps users decide where in the world to visit next.
- Users type in a country and are shown a description of the country, images and can view recommended activities. Two APIs were required, one for the images and one for the description and activities.
- I worked in a team of 6 to develop this application. My role included developing the image carousel and activities modal.
- Tools/Languages: HTML, CSS, JavaScript (including jQuery), Bootstrap 5, Git

Weather Dashboard | [Repository](#) | URL: <https://drrobotnik7.github.io/weather-dashboard/>

Role: Sole author

- A weather dashboard that shows users the current weather and a 5-day forecast for a specific location.
- Searches are saved in local storage and can be cleared.
- Tools/Languages: HTML, CSS, JavaScript (including jQuery), Bootstrap 5, Git

WORK EXPERIENCE

Tunbridge Wells Grammar School for Boys

September 2021 - present

KS3 Head of Year and Science Teacher

Tunbridge Well, Kent

- Overseeing the attendance, behaviour and progress of my year group. Making necessary interventions when required to guide students towards improvements in one of these three areas.
- Analysing attainment data, identifying areas of need, distributing data output from SISRA to classroom teachers and tutors to empower them with the knowledge needed to improve outcomes for all of their students.
- Coordinating and managing a 2-night residential school trip which involved almost 300 students.
- Presenting talks to parents during curriculum and careers evenings
- Presenting assemblies to the year group.
- Coordination and delivery of the PSHE curriculum.
- Tutor team management – designing and coordinating the tutor programme that is followed during registration. - Managing students on behaviour or progress reports – directing tutors and teachers to distribute and feedback to me - Managing and distributing positive pathway rewards.
- Pastoral support and safeguarding.
- Meeting with parents to address concerns raised in school, both for pastoral and behavioural reasons.

Harris Academy Greenwich

September 2018 - September 2021

Science Teacher

Eltham, London

- Progressed from a trainee to a fully qualified Teacher.
- Biology, Chemistry and Physics Teacher to KS3 and KS4 students.
- Ran the weekly Science club after school to promote engagement of Science to all students
- Managed KS4 Science homework across the school, a role that has involved; designing Science homework policies, implementing homework strategy, launching the programme, monitoring student data, issuing sanctions and rewards, organising weekly detentions, and assigning staff to manage them. Met my target to reduce detention numbers from prior years.
- Mentored a PGCE student. I observed him teach, provided him with feedback and helped him to develop his teaching skills. I submitted weekly observation reports to his University.

Johnson BIM

January 2017 - September 2018

Recruitment Consultant + Team Leader

Cannon Street, London

- Johnson BIM are niche construction recruitment specialists. BIM stands for building information management, a cutting edge 3D modelling technology that is revolutionising the construction industry. The economic recession has brought some of the most challenging years to the industry seen in a generation. This has been a very tough sector to flourish in and my success here is testament to my persistence in tough times.
- A small family business initially based in Bristol, it grew to a medium-sized team in London. Primarily a recruitment consultant, I took on team leadership and office management responsibilities during the business' growth. This required strong administrative skills, attention to detail, persistence, patience, time-keeping and organisation, a can-do attitude, thick skin, communication skills, computer literacy, high levels of self-motivation and most importantly a sense of humour.
- I was responsible for internal recruitment; advertising roles, selecting and interviewing applicants, then training up the new team members and nurturing them to success. What I enjoyed most about the role was the opportunity to meet and work with new people.

Hiatus - Moved to Tokyo, Japan for 1 year

February 2016 - January 2017

1st Step Recruitment

January 2015 - February 2016

Resourcer + Compliance Assistant

Dartford, Kent

- A dual role in which I both supplied labour to our clients and monitored compliance standards for the company.
- As a member of the resourcing team I was responsible for recruiting new talent in and around London. I recruited for all positions within the M&E, Construction and Rail sectors. These range from Plumbers, Electricians, Labourers, Ground Workers and Mates to Site Managers and Supervisors.
- As Compliance Assistant I worked alongside the Compliance Director to ensure company standards were being adhered to at all times. This involved carrying out audits and, when necessary, advising certain members of staff where mistakes were made and how to improve. I was also responsible for monitoring timesheets for all labour under the London and South East divisions. This was a crucial role, missing timesheets and inaccuracies were common and it was vital to ensure everything was accounted for before payroll ran each week.

Johnson BIM

September 2010 - December 2014

Recruitment Consultant + Team Leader

Bristol + Cannon Street, London

- My initial employment with Johnson BIM - I started as a Recruitment Consultant working with my Father and helped to grow the business, eventually opening an office in London.
- I left to pursue a career in a different sector of construction but would ultimately rejoin after my travels in Japan before leaving to retrain as a Teacher in 2018.

EDUCATION

EdX

February 2024

Front End Web Development Skills Bootcamp Certification

Kingston University

June 2019

PGCE Secondary Science

University of Kent at Canterbury

June 2009

BSc in Biology
